VCS752

The VCS752 is an innovative conference phone with exceptional flexibility. You can conduct small conference calls using the built-in microphone. For larger rooms or more participants, use the two included wireless microphones. For even more flexibility, you can add up to three VCS850 remote speakers. The wireless microphones and remote speakers connect using the DECT wireless protocol, which has a range of 100 meters. The wireless mics snap into the VCS752 for recharging, so they are always ready to go.
